 River or pond

- Special Flood Hazard Areas**
SFFHAs are subject to inundation by the 1% Annual Chance Flood, i.e., the 100-year floodplain.
- Mapped River Corridors:**
For streams with a drainage area of fewer than 2 square miles, corridors are not mapped (i.e., a stream with a drainage area of between 0.5 and 2 square miles), the corridor is measured 50 feet laterally from the top of the stream bank.
- 50' Buffer of Streams with a drainage area of between 0.5 and 2 square miles:**
For streams with a drainage area of between 0.5 and 2 square miles, the corridor is measured 50 feet laterally from the top of the stream bank. This does not show the 100-year floodplain. Corridors are measured 50 feet laterally from the top of the stream bank. This does not show the 100-year floodplain. Corridors are measured 50 feet laterally from the top of the stream bank.
