

Wetlands

Town of Putney, Vt.

December 2008

- Type of mapped wetland:
- Emergent
 - Forested, Broad-Leaved Deciduous
 - Forested, Dead
 - Forested, Needle-Leaved Evergreen
 - Scrub-Shrub, Broad-Leaved Deciduous
 - Unconsolidated Bottom (little to no vegetation)
 - No data
 - M - Possible man-made water body less than 2 acres (diked, impounded)
 - B - Possible beaver-influenced wetland
 - Hydric soil (may include unmapped wetlands)

- Stream
- Pond
- Interstate
- State/federal highway
- Class 2 town highway - paved
- Class 3 town highway - paved
- Class 2/3 town highway - unpaved
- Class 4 town highway
- Legal trail
- Private road
- Railroad
- Electric transmission line

1) The US Army Corps of Engineers maintains jurisdiction over most wetlands in Putney. These include most wetlands shown on this map, as well as many wetlands that do not appear on this map.

2) Some wetlands shown on this map are not mapped as part of the Vermont Significant Wetlands Inventory; these wetlands, however, may be considered significant by the State of Vermont. Other wetlands may exist that do not appear on this map, and these may be considered significant as well.

- This map should not be relied upon to provide precise information regarding the location or configuration of wetlands. This map is intended only to denote the approximate location and configuration of wetlands. The actual boundaries of the wetlands depicted on this map must be determined in the field. A wetland's determination as "significant" must be made in the field by Agency of Natural Resources (ANR) staff or upon review by the Natural Resources Board.

- Wetlands shown on this map were compiled from a number of existing data sources by Windham Regional Commission (WRC). All wetlands included in the Vermont Significant Wetlands Inventory (VSWI) are shown. Additional wetlands not part of the VSWI, but included in the National Wetlands Inventory (NWI), are also shown. Boundary locations for wetlands are from VSWI or NWI GIS data; some locations have been edited by WRC using orthophotos to improve accuracy. The type of wetland (the term "classification" is used by the U.S. Fish and Wildlife Service) is from NWI data. The special modifiers (beaver-influenced or man-made) are also from U.S. Fish and Wildlife Service, but for some wetlands have been edited by WRC using orthophotos.

A larger-scale version of this map is available in the Putney Town Office. The Putney Conservation Commission encourages citizen input to help improve the accuracy of these maps.
